SUMMARY

Software Engineer with experience building scalable backend services and distributed applications using Java, Spring Boot, and cloud technologies. Skilled in developing REST APIs, microservices, and SQL data pipelines supporting high-performance web applications. Experienced working with AWS environments, CI/CD pipelines, and full-stack web technologies in Agile development teams. Passionate about designing reliable, scalable backend systems and cloud-based applications for high-performance distributed platforms.

SKILLS

Programming & Frameworks: Java (Spring Boot, Spring MVC), Python, JavaScript, React, SQL, HTML5, CSS3

Backend & Systems: REST APIs, Microservices, Multithreaded Programming, Distributed Systems, Data Structures, Git, CI/CD, Linux

Cloud & Databases: AWS, MySQL, PostgreSQL, Query Optimization, Google Cloud Platform, Data Pipelines

EXPERIENCE

Zoku

Atlanta, GA, USA

Software Engineering Intern

July 2025 - Present

- Designed and optimized scalable backend services and REST APIs using Java, Spring Boot, and MySQL, improving performance by ~20%.
- Built modular frontend components using JavaScript, React, HTML5, and CSS3, enabling responsive cross-platform user interfaces.
- Developed automated CI/CD workflows and SQL data pipelines supporting product features and real-time application datasets.

Georgia State University

Atlanta, GA, USA

Research Assistant

January 2025 - May 2025

- Developed a Hybrid CNN-LSTM machine learning model for coronary artery disease detection using 1,200+ MRI scans.
- Built scalable data preprocessing pipelines and analytics workflows achieving 99.7% accuracy across validation experiments.
- Designed data storage and processing pipelines using MySQL and JPA managing 10K+ research records.

Georgia State University

Atlanta, GA, USA

Graduate Research & Teaching Assistant

January 2024 - December 2024

- Mentored 80+ graduate students in Programming Language Concepts, debugging complex programs and algorithmic challenges.
- Conducted applied machine learning experiments on 20K+ structured records using Python-based data pipelines and analytics workflows.
- Led 25+ lab sessions and code reviews improving students' understanding of data structures and system design.

360 Research Foundation

Andhra Pradesh, India

Software Engineer Intern

May 2021 - August 2021

- Developed a web-based quiz and assessment platform using PHP, MySQL, HTML5, CSS3, and JavaScript.
- Designed backend server logic and relational database schemas supporting quiz management and result processing.
- Built responsive user interfaces and deployed the application for production use with stable web performance and usability.

EDUCATION

Georgia State University

August 2023 - May 2025

Master's, Computer Science

GPA: 3.57

SRM University AP

June 2019 - May 2023

Bachelor's, Computer Science

GPA: 3.2

PROJECTS

Tech Skill Radar – Developer Platform Analytics Dashboard

Vision-Language Transformer for Medical Report Generation from Chest X-Rays

Hybrid CNN-LSTM Model for Coronary Artery Diseases(CAD)

Secure NFT Wallet for Web3 Ecosystem

Fuzzy Logic Integrated CNN for Rice Classification
